Fullerton, CA | +1 (657) 681-6640 | nanditasuryawanshir@gmail.com | linkedin.com/in/nandita-suryawanshi-a45054224

PROFESSIONAL SUMMARY

Master's student in Computer Science with professional experience as Software Engineer in developing scalable backend services, REST APIs, microservices, and full-stack applications using Java, Spring Boot, SQL, and React. Skilled in backend engineering, database optimization, and frontend development, with a track record of delivering production-ready code that improves system performance and reliability. Currently pursuing an M.S. in Computer Science at California State University, Fullerton, with a strong foundation in data structures, algorithms, and system design.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, C, JavaScript, SQL, HTML5, CSS3

Frameworks & Backend Engineering: Spring, Spring Boot, Spring Cloud, React.js, Bootstrap, Maven, Junit, Mockito, REST API Design, Microservices, JWT, Hibernate, JPA, MVC Architecture, JSON Processing, OAuth, SLF4J, Log4j.

Databases: MySQL, Oracle, Database Optimization, Query Performance Tuning

Data & Machine Learning: NumPy, Pandas, Scikit-learn, Matplotlib, Pytorch, Tensorflow, Jupyter Lab, Feature Engineering, Model Training and Evaluation, Predictive Analytics, strong understanding of machine learning concepts, model evaluation, retrieval systems, large language models.

Tools & Practices: CI/CD, Git, JIRA, Postman, Agile/Scrum, Unit Testing, Multithreading.

Core CS: Object-Oriented Programming, Data Structures and Algorithms, System Design.

PROFESSIONAL EXPERIENCE

Software Engineer Student Assistant — California State University, Fullerton

June 2026 – Present

- Developed and maintained responsive frontend user interfaces using React.js, JavaScript, HTML5, and CSS3, improving usability and user experience across the college website.
- Managed 15+ department web pages and achieved 100% WCAG compliance across all department web applications.
- Designed and prototyped UI layouts using Figma, Canva, and Omni CMS, managing end-to-end web publishing, page updates, and site maintenance.
- Ensured strict ATI and WCAG/ADA compliance across web pages to guarantee accessible digital content for all users.
- Troubleshooted frontend bugs, published new department pages, and updated legacy web content to streamline website operations.

Software Engineer II — R Systems International

Jan 2025 – Jan 2026

- Developed and maintained production backend services using Java, Python, and SQL, contributing to backend development, model building, and database management.
- Developed Spring Boot microservices with Hibernate/JPA, ensuring efficient ORM integration and clean architecture.
- Developed and maintained backend services for a telecom client using Java, Spring, and Spring Boot within an MVC architecture, following Maven-based build processes to ensure modularity and scalability.
- Implemented an internal tracking tool with Maven, improving operational efficiency by streamlining workflows.
- Collaborated with cross-functional teams to define and design new features, ensuring alignment with client requirements and Agile development practices.
- Identified and resolved 50+ performance issues across backend services (Java, Spring Boot, microservices, Maven, MySQL), improving system stability and reliability.

Software Developer — Metamorphosys Technologies

July 2023 – July 2024

- Developed Spring Boot services to implement new business functionalities, integrating REST APIs and ensuring scalability across microservices.
- Wrote code in Java, Python, and SQL, contributing to product development.
- Developed unit tests with JUnit to validate backend service functionality, achieving 90%+ code coverage and reducing regression defects.
- Participated in architecture and design reviews to implement product improvements and optimize system performance.

PROJECTS AND RESEARCH

Student Education Website — Full-Stack Web Application

- Developed a full-stack platform using React.js and Spring Boot with MVC architecture for modular design.
- Implemented secure JWT authentication to protect user accounts and ensure role-based access control.
- Designed RESTful APIs for managing student profiles, courses, and enrollment data.
- Optimized MySQL queries to improve query performance and handle relational data efficiently.
- Applied unit testing with JUnit to maintain high code quality and integrated logging with SLF4J for monitoring and debugging.

Advanced Machine Learning Classifiers and Ensemble Techniques for Enhanced Predictive Accuracy in Heart Disease Diagnosis Published in IJIRCE, Volume 12, Issue 9, September 2024 (Impact Factor: 8.625)

- Applied ML classifiers including Naive Bayes, Random Forest, and KNN with hyperparameter tuning to maximize accuracy and precision.
- Developed an ensemble voting classifier integrating multiple models, achieving 90.16% accuracy and 91.85% precision, outperforming individual classifiers.
- Implemented preprocessing (train-test split, stratified sampling, feature engineering) to ensure robust, generalizable results.
- Built a predictive system in Python to classify patient risk based on medical attributes such as age, cholesterol, and chest pain type.

EDUCATION

Master of Science in Computer Science — California State University, Fullerton

Jan 2026 – Jan 2028

Subjects: AI, ML, Advance DBMS, Software architecture and designing, Ethical Software engineering and Web Development

Bachelor of Engineering in Computer Science —Savitribai Phule Pune University, CGPA: 8.32 / 10

Aug 2019 – June 2023

LEADERSHIP, EXTRACURRICULARS & CERTIFICATIONS

- Active Member: Women in Computer Science and Engineering (WiCSE) & Associated Students, Inc. (ASI)
- First Place, Web Designing Competition — National-Level Technical Symposium (K.K.W.I.E.E.R.)
- Advanced Certificate in Back-End Software Development (83.48%) — IIT Roorkee
